DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-13 and 21 rejected under 35 U.S.C. 102(e) as being anticipated by Song (U.S. 6,091,464). Note in figure 4a, the capacitor section formed by the overlap of the gate bus line 110, metal segment 150, and the extended portion of pixel electrode 130a. As shown in figure 5d, a metal such as aluminum or chromium is deposited using a sputtering method. The data line 120, the source electrode 120a, the drain electrode 120b, and metal segment 150 are formed from this metal layer. So metal segment 150 is formed of the same conductive film as data line 120. See column 3 line 30 – column 4, line 50.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-20 rejected under 35 U.S.C. 103(a) as being unpatentable over Song (U.S. 6,091,464). Because the method steps of these claims are merely a recitation of structural features of the device, they are not patentably distinct from the disclosure of Song.
